

Motorized Carts

Handicap competitors are the only shooters allowed to operate a motorized cart or scooter on the range or in the event area.

All competitor's motorized carts and scooters on the range or in the event area must display a Handicap Permit issued by Winter Range.

For competitors to obtain a Winter Range Handicap Permit you must present your officially issued Handicap Placard when you pick up your registration packet.

Winter Range understands that Ben Avery is a large facility and non-handicap shooters may need a motorized cart to transport their equipment between the parking lot or their campsite to the range. There will be a designated parking area in the Southwest corner of the event area for those carts.

Competitors please do not drive your non-handicap cart on the range or in the event area.
